

OS Lab 6

Q1. Add a user program to xv6 and make it available to the user at the shell prompt.

Reference: <http://recolog.blogspot.com/2016/03/adding-user-program-to-xv6.html>

Q2. Add a new system call *myyear()* to xv6 which prints your birth year. The system call does not do anything useful, but helps you to understand, where in the source code you have to make changes.
